OVERVIEW

I'm a backend developer with a focus on Symfony, currently working as a freelancer. I have a basic understanding of CI/CD and server management, mostly from deploying my own applications. While I primarily work on backend projects, I'm also familiar with frontend technologies, which I often use when developing my own Shopware 6 plugins. To date, I've created 8 plugins, handling everything from design and frontend to backend development and marketing.

WORK EXPERIENCE

Hmmh Poland - Web Developer
04/2023 - Present

I focus on building custom e-commerce solutions using PHP and Symfony, mainly for B2B platforms. With solid experience in Shopware 6, I create tailored features that help businesses improve their online stores and meet specific needs.

Sunzinet - Web Developer
07/2021 - 03/2023

I gained strong skills in Shopware 6 and improved my programming by following best practices.

PROJECTS

Shopware 6 Extensions

See Shopware store

Static Pages Cms Sections

Shopware 6 extension - Plugin allows displaying CMS sections, including their blocks and slots, on static pages like user account or registration views which improves shopping experience.

Deepl Translations

Shopware 6 extension - Plugin enables easy translation of products, properties, categories, and much more. Powered by DeepL Translator's AI, it ensures fast, accurate, high-quality translations.

EDUCATION

Polish-Japanese Academy of Information Technology Gdansk
Computer Science | October 2020 - November 2021

I quit after I landed my first internship. During this period, I had time to grasp computer science concepts.
